examines the nature of practical ethics from the point of view of the mother and argues that caring is the basis of morality

Care ethics and political theory brings together new chapters on the nature of care ethics and its implications for politics from some of the most important philosophers working in the field today. Chapters take up long standing questions about the relationship between care and justice and develop guidelines for the development of a care based justice theory. Care ethics is further applied to issues such as security, privacy, law, and health care where little work has been previously done by bringing care ethics into conversation with non-western and subaltern cultures. The contributing authors further show how care ethics can guide and learn from other traditions. A final set of chapters uses care ethics to challenge dominant moral and political paradigms and offer an alternative foundation for future moral and political theory. The book as a whole makes the case for care ethics as an equal or superior approach to morality and politics compared with liberalism, luck, egalitarianism, libertarianism, the capabilities approach, communitarianism, and other political theories. The volume includes many of the leading care scholars in the world today engaging in both theoretical and applied discussions of this burgeoning field of study. Ultimately care ethics and political theory endeavors to find realistic methods and ways of thinking to create a more caring world.

in this provocative new book renowned educator and philosopher nel noddings extends her influential work on the ethics of care toward

virginia held assesses the ethics of care as a promising alternative to the familiar moral theories that serve so inadequately to guide our lives the ethics of care is only a few decades old yet it is by now a distinct moral theory or normative approach to the problems we face it is relevant to global and political matters as well as to the personal relations that can most clearly exemplify care this book clarifies just what the ethics of care is what its characteristics are what it holds and what it enables us to do it discusses the feminist roots of this moral approach and why the ethics of care can be a morality with universal appeal held examines what we mean by care and what a caring person is like where other moral theories demand impartiality above all the ethics of care understands the moral import of our ties to our families and groups it evaluates such ties focusing on caring relations rather than simply on the virtues of individuals the

book proposes how such values as justice equality and individual rights can fit together with such values as care trust mutual consideration and solidarity in the second part of the book held examines the potential of the ethics of care for dealing with social issues she shows how the ethics of care is more promising than kantian moral theory and utilitarianism for advice on how expansive or not markets should be and on when other values than market ones should prevail she connects the ethics of care with the rising interest in civil society and considers the limits appropriate for the language of rights finally she shows the promise of the ethics of care for dealing with global problems and seeing anew the outlines of international civility

in this collection of essential essays nel noddings examines alternatives to prevailing models of character education a sympathetic approach based on an ethic of care covering both stories in the classroom and controversial issues in education noddings describes the similarities and differences between character education and care ethics examines how moral education might be infused throughout the curriculum and calls for greater cooperation across fields and more attention to the practical problems of everyday teaching

two of our greatest educational theorists john dewey and nel noddings have been reluctant to admit that some students are simply more talented than others this was no doubt due to their feeling that such an admission was inconsistent with democratic concern for everyone but there really is such a thing as superior talent and the present book explains how that admission is compatible with our ideals of caring and democracy traditionalists confident that some disciplines are more important than others haven't worried that that way of putting things threatens to make those who are excluded feel quite bad about themselves but an ethics of care can show us

how to make these differences much less hurtful and more morally acceptable than anything that has been proposed by traditionalists so the present book offers a middle way between the denial of the reality of superior talents and an insensitive insistence on that reality it argues that care ethics gives us a way to do this and it bases that claim largely on the promise of such an ethics for moral education in schools and in homes it is argued on psychological grounds that caring can only take place on the basis of empathy for others and the book shows in great detail how empathy can be encouraged or develop in school and home contexts other approaches to moral education like kantian cognitive developmentalism and aristotelian character education can't account for increasing moral motivation in the way that an emphasis on the development of empathy allows and in the end it is only students educated via care ethics who will be sensitive to one another in a way that largely undercuts the negative psychological impact of educational institutions and practices that acknowledge the greater talents or creativity that some students have

applying care ethics to business is a multidisciplinary collection of original essays that explores the intersection between the burgeoning field of care ethics and business care ethics is an approach to morality that emphasizes relational particularist and affective dimensions of morality that evolved from feminist theory and today enjoys robust intellectual exploration care ethics emerged out of feminist theory in the 1980s and the greatest contribution to moral analysis among women studies scholars today feminists and non feminist scholars are increasingly taking care ethics seriously applying care to the marketplace is a natural step in its maturity applying care ethics to business is the first book length analysis of business and economic cases and theories from the perspective of care theory furthermore given economic turbulence and the resulting scrutiny of market practices care ethics provides fresh and timely insight into ideal

business values and commitments in many ways care ethics emphasis upon connection and cooperation as well as the growth and well being of the other make it appear to be the antithesis of the corporate character nevertheless many contemporary theorists question if traditional moral approaches based on autonomous agents is adequate to address a shrinking and interconnected world particularly one that is marked by global markets applying care ethics to business offers a unique opportunity to rethink corporate responsibility and business ethics

looks not only at the financial emotional and physical demands of giving and receiving care but also at the strengths and rewards inherent in the world of caregiving

care ethics and poetry is the first book to address the relationship between poetry and feminist care ethics the authors argue that morality and more specifically moral progress is a product of inquiry imagination and confronting new experiences engaging poetry therefore can contribute to the habits necessary for a robust moral life specifically caring each chapter offers poems that can provoke considerations of moral relations without explicitly moralizing the book contributes to valorizing poetry and aesthetic experience as much as it does to reassessing how we think about care ethics

in justice care and value thomas randall argues for the radical potential of care ethics as a distinct and preferable theory of distributive justice advancing the feminist literature this book defends a vision of society that can best enable caring relations to flourish specifically randall proposes a values driven theory of care ethics that derives normative criteria for evaluating the moral worth of caring relations

and their surrounding institutions via a classification of the values of care they argue that such a theory gives us unique and meaningful solutions to contemporary questions of distributive justice across personal political global and intergenerational domains in doing so the book makes significant strides to engage care ethics with the broader moral and political philosophy literature topical and interdisciplinary randall demonstrates that care ethics has the conceptual resources to ground distributive theories of socialism territorial and natural resource rights obligations to future generations and historic redress the book will be of great interest to academics researchers and students of feminist philosophy but also of liberalism political economy and theories of global and intergenerational justice
